

Warranty

All bows are completely made in Germany with utmost care by highly skilled craftsmen, using only the most advanced and durable materials. We offer a 15 year warranty on the stick, which is not limited to the initial owner, but transfers to any future owner and user. The frog is covered by a 2 year warranty. The hair, winding, thumb leather, screw and eyelet are excluded from any warranty as they are subject to normal wear and tear.

Sustainability

Carbon fibre composites are synthetic materials which can be recycled like similar materials that are used to manufacture strings or instrument cases. Their biggest advantage is that our bows are made to last decades and possibly centuries, thus leaving the smallest possible ecological footprint possible.

Violin Bows 2026

Enjoy the Magic

Whatever you knew about bows is going to change the instant you play with a Müsing bow. Like every other musician you will experience the sound of the finest old, completely unaffordable, French master bows, a marvellous handling, wonderful comfort, unsurpassed reliability and durability - at a price that is shockingly moderate.

All this is made possible by combining a deep understanding of the physics of the bowed instruments with advanced materials, the latest technology and great craftsmanship. The hollow and thin-walled sticks of the Müsing bows are made from three-dimensional woven carbon fibres in a high-strength epoxy matrix, combining ideal strength with perfect resonance characteristics.

For the outfit we use not only traditional silver, nickel, ebony, and snakewood, but stainless steel and aircraft-grade aluminum to achieve modern elegance and superb durability.

The C- and L-Series

In a blind test nobody can tell the sound of the C-series bows from high quality pernambuco bows. They draw exactly the same rich, brilliant, complex and warm sound. They handle with great ease and allow to execute any bow stroke with immaculate precision.

The L-series is going one step further still, drawing an even cleaner and more powerful sound and play with amazing agility and virtuosity. They provide precise articulation and a very powerful sound with superior projection. Particularly the L5 and L6 bows are highly recommended for competitions, auditions and solo performances.

cello bows	C	L
elasticity	medium-high	medium-high
weight	ca 75 grams	ca 71 grams
tip	polycarbonate, white	aluminium
sound	identical to fine wooden bows	clear, rich, powerful
handling	straightforward, supportive	agile, somewhat demanding

C 5	outfit	frog	sound	price
	935er silver	ebony	*****	\$ 2,060

C 4	outfit	frog	sound	price
	stainless steel	snakewood	****	\$ 1,500

C 3	outfit	frog	sound	price
